- **Back-end:** Springboot, Spring Security, Spring Data Jpa, Hibernate, JWT, OAuth 2, Mockito
- **Front-end:** Angular, Tailwind CSS, TypeScript
- **Databases:** PostgreSQL, H2 for testing

...

EXPERIENCES

Internship: June 2024 – September 2024

ID&A TECH | Casablanca

Full-Stack Developer (MERN)

Missions:

During my internship at ID&A TECH, I utilized the MERN stack to engage in various web development projects. My responsibilities encompassed designing innovative solutions, creating dynamic interfaces, managing databases, and optimizing performance and security. I developed the following platform:

- **Hikma Invest**: a behavioral analysis platform that provides tailored investment recommendations based on user preferences.
- Web link: https://my-floussi-front.onrender.com/

Training: May 2024

Simplon Maghrib By JobInTech | Casablanca

JAVA Backend Application Developer – Simplon

Missions:

I completed a comprehensive training program in web development that significantly enhanced both my technical and transferable skills. This structured curriculum provided me with the opportunity to undertake over ten tangible projects, including:

- **LabXpert:** a platform devoted to laboratory management.
- **Connexia:** a social network designed to foster community engagement.

These experiences not only enhanced my skills in front-end and back-end development but also deepened my overall comprehension of the field.

Internship: May 2023 – September 2023

redgato | Al Hoceima

Full-Stack Developer (Spring Boot/Angular)

Missions:

My internship at Redgato enhanced my expertise in full-stack web development, particularly with Java Spring Boot and Angular. I contributed to the Dentalix platform, which streamlines the ordering process for dentists from laboratories, as well as to Anomalia, an anomaly detection system for water dams that employs data analysis and artificial intelligence.
